Residential Waste Service Day Adjustment

LOS ALAMITOS, CALIF. – A percentage of Los Alamitos residents will see a slight alteration to their waste service day schedule. Residents from identified routes can expect their waste collection on Fridays and every Friday thereafter. This change will take effect Friday, March 4, 2022. Residents from the identified list found on the City's website should be prepared to adjust to this change.

Universal Waste Systems Inc. (UWS) is prepared to assist with the notification of this change to those that are impacted by placing sticker notices over each gray trash cart lid with the following message, *"Starting Next Week, Your New Collection Day is: Friday"*.

The placement of the sticker is intended for residents to have to remove the sticker to dispose their trash and in effect alert them of the change. Additionally, the City will inform residents through the City's social media platforms, newsletters, City's website and other publications. Residents who do not receive a sticker or whose address is not listed will not be impacted and can still expect their trash service to occur on Thursdays. The purpose of the adjustment in service schedule is to provide additional service and efficiency, and to strategically cover Los Alamitos citywide.

For verification of impacted addresses, please contact the Development Services Department at (562) 431-3538 or you can visit the city website at <https://cityoflosalamitos.org/DocumentCenter/View/1504/City-of-Los-Alamitos-Friday-Route-Customer-List-PD> to view the full list.
